

CRAWFORD Perspectives

SOLAR BLAST THIS MONTH!

November 5, 2013 Vol. 13/11

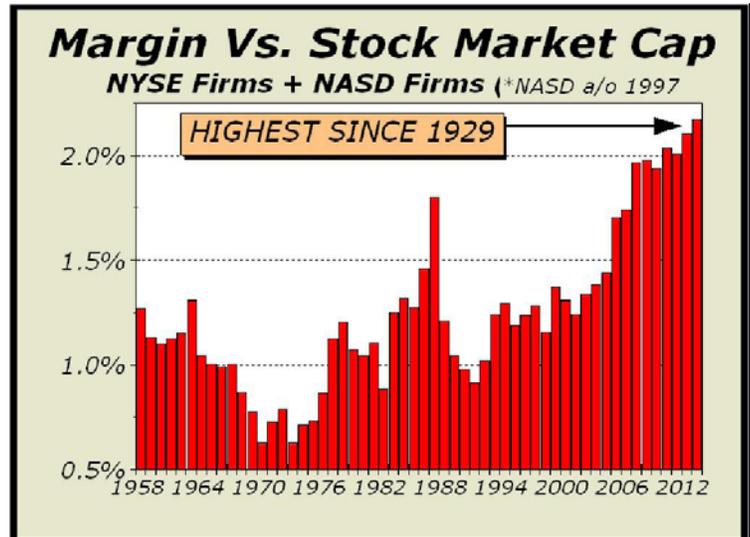

Last month we wrote: "The sky patterns are pretty grim over the next few days, at least to October 13." The government shutdown lasted until the 16th. Meanwhile, the Bradley Model on the INDU chart (page 2) showed the drop into a low around October 8 and a rise to about NOW, while upside momentum is beginning to lag and MACD indicators are nearing SELL signals. One of the best signs will be as the NYSE New Lows expand to over 40 for 3 days in a row.

Now, about this Solar Flare thing, there are the most incredible planetary alignments forming angles around the face of the Sun, the most powerful in all of historical knowledge about these things, during this month of November. These are much tighter patterns than any previous and are likely to trigger the most amazing magnetic storms on the earth, far more dangerous than the strongest ones from historical perspective.

Worst case, they melt the earth and everything on it – we think that highly unlikely. However, it would NOT be surprising if some important damage was to be inflicted upon our electrical grid. Our own government has warnings of that on several websites, including FEMA. See for yourself: <http://m.fema.gov/before-space-weather>

The most critical times are November 13 and 23, with other strong possibilities for Nov. 9, 18-20, 29-30 and Dec. 1. Also in December, watch for the 6th and 19-20th.

Geocentric (as seen from the Earth) Mars opposes Uranus on Christmas Day and begins an exceptionally long period of the Mars-Uranus Crash Cycle, lasting until January 2015. Our strong opinion is for Major World Crash during that period. We do not know anyplace to hide from that one!

The chart (above) and a quote inside are from Alan Newman in his *CROSSCURRENTS* newsletter. www.cross-currents.net It points up an amazing statistical comparison, and a dangerous one! The amount of stock market margin as percent of total stock market capitalization is reaching for that which occurred right before the crash in 1929! In another statistical oddity, all the talk of P/E Ratios always ignores those prior to 1946. Current levels are way, way above historical levels of earlier times. In fact, the 2001-2 market decline dropped P/E's down ONLY to the High levels of 1929, meaning that the Grand SuperCycle has one heck of a long way down to correct the multi-decadal inflationary aberrations.

We have been studying cycles for many years, even before the astronomic cycles. But the astronomic cycles threw a whole new revelation into the mix. There are cycles within cycles, but after computing many cycles and adding them over time, a fairly good picture of possible outcomes can become apparent. The surprising thing is that when a number of astro-cycles converge, it can create a complex pattern of multiple harmonics in one short instance of time.

This new multiple harmonic is a new unique kind of animal and may be totally contrary to their summation. The new 'thing' acts as a "Strange Attractor" in fractal forms, and in markets can bring prices Up to that single date or Down to that single date, and then reverse them suddenly and dramatically.

THAT is the quality and intensity of the events of November, especially 1st to 3rd, 13th and 23rd, plus/minus 2-3 days.

Considering near term markets are overbought, we don't want to wait too long to Short, nor jump too soon and be stopped.

SHORT 100% DJIA and S&P500 when you get this notice. Place 5% Stoploss order on a close only basis. Increase to 200% Short on a close below 14,900 DJIA or 1738 S&P500. Place 5% Stops on your new positions, leaving the older stops unchanged.

YOU MUST FINISH SURVIVAL PREP BEFORE NOV. 13!

VITAL SIGNS

SHORT 100% DJIA IMMEDIATELY

Place 5% STOPLOSS ORDER

INCREASE TO 200% DJIA

on any Close Below 14,900

Place new 2nd 5% STOP

Our S&P's were stopped 10/17 at 1733.15

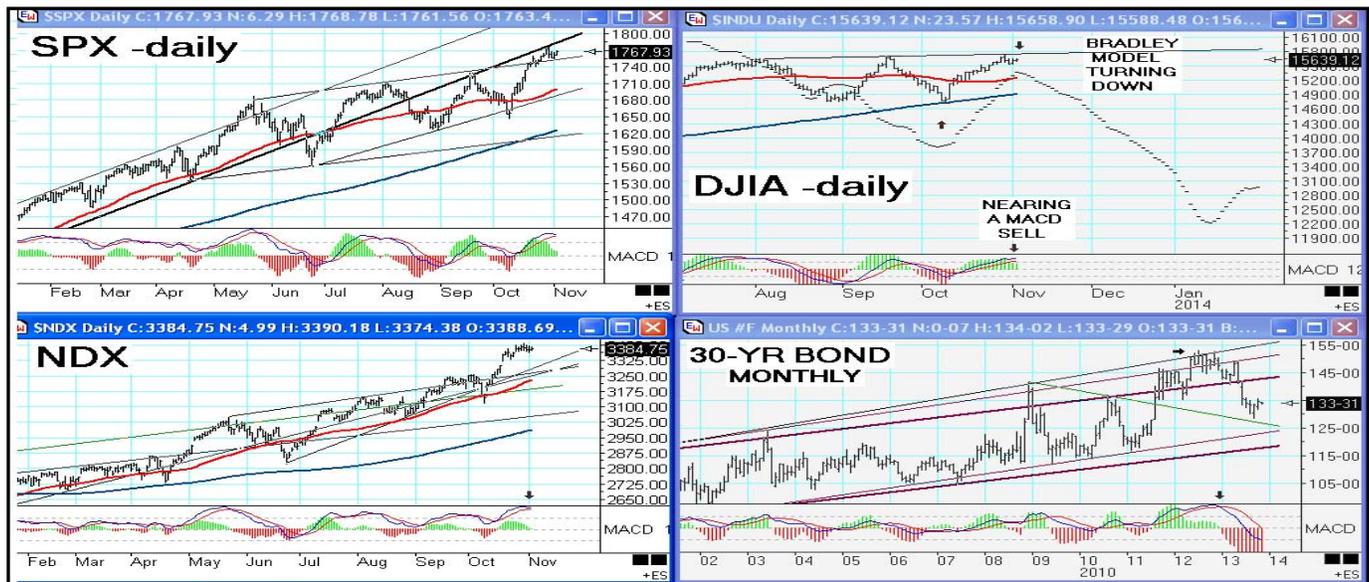

SHORT 100% S&P IMMEDIATELY

Place 5% STOP

Increase to 200% SHORT IF HIT 1638

If activated use New 5% STOP

ALL OUR STOPS ARE CLOSE ONLY!

INDICES MAY BE ROLLING OVER NEAR TERM – MOMENTUM DRYING UP!

S&P500 (SPX) and **DJIA** rallied back to New Highs last week yet were back to rising resistance trendlines. The **SPX** returned up under a long term lower trend channel line (darker black) which is now defining tops as it previously was defining bottoms. The **DJIA** is within a modestly rising trend over the last few months and has, since its September 18 high, closely followed the projected line of the Bradley Model.

The **BRADLEY** turns sharply lower from about NOW into a low in mid-January. There is certainly no guarantee that the markets will follow it at any particular time, but over time, it has a respectable record of calling turning points, and even direction in well over half of instances. Especially with strong moves indicated, it is best not to ignore its potential implications. Even better when other technical tools confirm. The Mars-Uranus Crash Cycle calls for a peak on Christmas Day and a crash sometime between there and January 2015.

Only the **NDX** has overshot its bearish wedge position into higher ground, even there momentum has begun to lag. Also the **NASDAQ** has experienced more days than the others where Volume direction has not confirmed Price direction (Higher on Lower Volume or Lower on Higher Volume). We opine that is a sign of heavy outside manipulation!

There is as yet no visible break-down of chart patterns, nor any internal technical indicators that have called for the top to be past. The most negative sector is with Sentiment readings, and many of them are becoming frothy enough to declare that a Bubble has developed, but none of those have determined a limit on the advance.

The Mars-Uranus cycle has a strong tendency to spike up into the opposition of these two planets, and peak there. That does not occur until Christmas Day, December 25. That is not to say that the very powerful outer-planet aspects in play this month could not cause the cycle peak to occur early or in left-handed translation. But at this point there is nothing to say that it Must, either. The extremely tight alignments in the Helio (Sun-centered) sky look to be strong enough to override even the Federal Reserve and their printing presses. However, the dissonances warn us to be prepared and ready for anything. So it won't hurt to keep some extra food and water on hand as if one might be on Hurricane watch!

A meaningful break above the **10-Year Rate** of 2.85-3.00% would likely precipitate immediate powerful reactions in world equity markets. Otherwise, if the resistance area contains the advance for the present, rates may well subside into a possible Right Shoulder of the larger bottom formation to perhaps the 2.30-2.50 support, even to 2-2.10 but less likely. The monthly **30-year BOND** in chart four appears to have formed a temporary low and may attempt a further rally but it seems evident that the long-term top has formed and passed.

“The latest stock market rally ran out of steam last week, with stock prices finishing mixed and little changed. Stock market indicators have been pointing upward for the most part over the past 3 weeks, but bearish technical divergences now appear to be building to critical levels. And the surveys of investor sentiment now show even more bulls and very few bears, which is bearish by The Art of Contrary Thinking. History shows that most investors are wrong at the major market turning points. History also shows that no trend lasts forever, & all markets fluctuate up & down, often with price swings so large that they surprise the majority. A downswing is due.”
Robert W. Colby - www.colbyassetmanagement.com

SUN ABOUT TO EXPLODE?!

Although the exact square (90 degree aspect) between Uranus and Pluto, looking out from the Sun, is actually on November 23rd, the most exact EVER T-square, with Jupiter in opposition to Pluto and square Uranus (red triangle on chart at right) takes place on November 13, exact to 1/20 of one degree! On that same day Mars forms an exact square to Saturn.

This will likely be the most extreme Solar Activity in ALL of written history, with high activity this entire month! The "house system" as if based in DC is irrelevant here.

The greatest historical Solar Storm took place on the Sun August 28-September 2, 1859 which "slammed into the atmosphere" September 2, 1859, causing telegraph instruments to continue chattering, even when turned off, and setting widespread fires. It "...was three times more powerful than one that cut power to an entire Canadian province in 1989." "If a storm that severe occurred today, it could cause up to \$2 trillion in initial damages by crippling communications on Earth and fueling chaos among residents and even governments in a scenario that would require four to 10 years for recovery, [according to a report](#) earlier this year by the National Academy of Sciences." These quotes are from:

<http://www.space.com/7224-150-years-worst-solar-storm.html>

Friend Ingo Swann, who taught government people for 19 years the psychic practice of Remote Viewing for purposes of intelligence gathering. Among them was Major Ed Dames, who with some other "viewers" are projecting that a powerful Kill-Shot from the Sun will cause significant damage on the earth, but they have not been able to get a reading on WHEN this might occur. Search: "Ed Dames" on any search engine or on YouTube, as videos are also available. Ed is hyping the negative case. We say that IF such is going to happen, it will be THIS MONTH! We hope to God that the blow will be a 'glancing' one! Ingo wrote an article about me in **FATE** magazine in 1999. He was remote viewing heaven and decided to stay this Jan. 31.

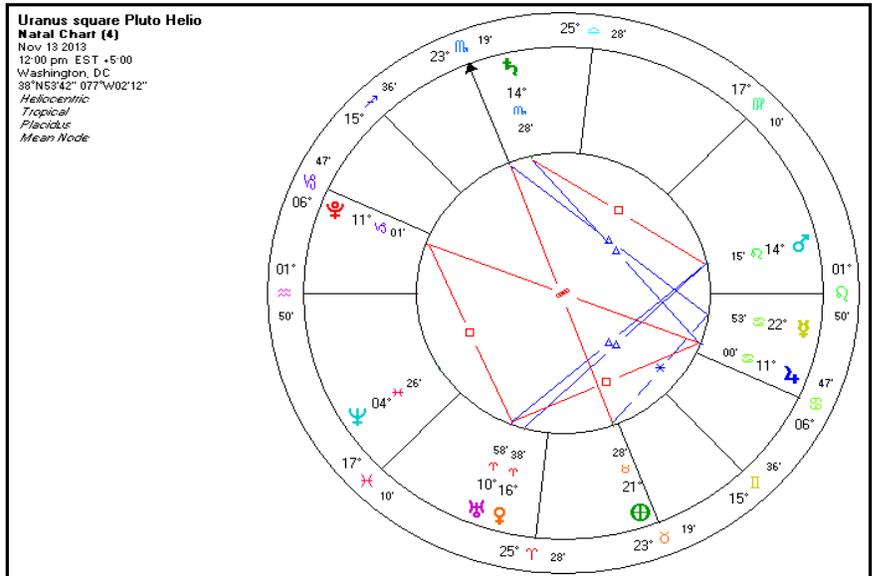

Another friend, John H. Nelson was a radio propagation specialist for RCA corp. in the 1940's-50's. He discovered how to predict Solar radiation by planetary arrangements around the Sun's surface. He counseled NOAA hour by hour on the Solar Flux which had caused an early fall from orbit of "Skylab" satellite July 16, 1979. His 'how to' book, **COSMIC PATTERNS**, is still available at AFA, 6535 S. Rural Rd., Tempe, AZ 85283. Toll Free 1-888-301-7630

Although Nelson was a hard-headed New England engineer who had no interest in astrology until a lady at an astrology conference told him he would sell his house on a particular date, and he did. He only spoke at astrology and shortwave radio conferences as no one else was interested in his work, at least after satellites reduced the needs of RCA. We chatted often until his passing in the 1980's. I once said: "John, I know you don't use Pluto [because of its negligible gravitational effect] but it's showing up in my stock market statistics." He says: "I'll check my notes." Comes back with this: "You're Right!" and he included it thereafter.

I once dropped in at the NOAA solar labs in Boulder, CO and told them about Nelson's work and that they could probably use it. They handed me over to a "flunkie" who showed me around and then out the door.

"If we added in all transactions listed as 'dispositions' and 'automatic sales for all the companies shown here [top 12 Nasdaq QQQ stocks] the picture would be considerably worse. What is most important is that the trend in insider activity continues to deteriorate. Insiders simply show near zero confidence in the future for the companies they work for. ... Invest. Intel. :3 week Bull/Bear Ratio 2.6 Extreme Optimism; Rydex Assets Bull/Bear Ratio: 12.8 Euphoria; Mutual Funds: 3.7% cash: Extreme Optimism"
Alan M. Newman – www.CROSSCURRENTS.net

For metals we have purchased from Pat & Linda Gorman at Resource Consultants in Tempe, AZ (1-800-494-4149) and www.buysilvernow.com I have been a speaker at their Tempe conferences for over 10 years. For long-lasting FOOD items I bought from Virgil Jackson and Celeste Chiappetta at Living Valley, LLC in Bigfork, MT (406-837-1350). They are very knowledgeable *Preparedness Consultants*, specializing in long term food storage. I bought food from them in March 2010, since doubled in price. livingvalleyfoods@gmail.com

OIL BACKED OFF FROM BREAK-OUT!

OIL has traced out a multi-year long trading pattern in the shape of a Triangle, that is, narrowing swings from the past to the present. Then in mid-year it broke out the upper range trendline just under 100 and moved smartly higher to our lowest projected target levels. It then made a small triangle which increased the chart 'count' but then failed with an 'end-run' back below the smaller pattern.

If the decline is held to the area at the convergent end of the pattern, it could be considered a 'normal' pull-back from an upside breakout, & could conceivably achieve some of the higher indicated 'counts' of 125-130. A penetration of the 90 support level would render the positive case null and void, at least until proven otherwise.

GOLD (not shown) is forming its own Triangle pattern between the downside breakout point in April at 1524 to the June 28 low of 1179, narrowing towards a point that will close in January just above 1300, barring a breakout one way or the other prior to then. The upside will be enhanced above 1340-50 range or the downside below 1240-50. The triangle has a tendency to continue the direction prior to its formation, but it can be a reversal upon breaking out in the opposite direction and then completing a more complex process similar to the OIL chart (above). So far, the odds favor another attempt to break lower, but the metals do tend to be trickier, giving more false break-outs before a clear direction is confirmed. We would prefer the Precious Metals over the long haul, even if trending lower initially, in this uncertain atmosphere where the value of fiat currencies remain questionable.

ASTRONOMIC ACTIVITY – (Give all these a time period of +/- 2-3 Days)

- NOV 5-6 = Venus enters Capricorn, Sun joins Saturn = No fun around here – More Dour and depressing. – Austerity?! Next CP letter 5th.
- NOV 6-7 = Helio Mars/Saturn=Galactic Center Earth/Saturn=9 Planet Average position
- NOV 7-13 = Series of compatible aspects makes politics better. Possible austerity brings Gold into a LOW during this period.
- NOV 9 = Helio Jupiter/Pluto midpoint = Venus conjunct Uranus. Sunspots and Solar Flares in abundance.
- NOV 13 = Closest Helio passage of a T-square involving Pluto-Uranus-Jupiter. Possible Kill-Shot from the Sun. Finish Prepping by NOW!
- NOV 17 = Helio Mercury conjunct Mars both square Saturn = Solar activity continues at record levels.
- NOV 18-20 = Helio activity remains Very High since Earth and the Avg. of 9 are semi-square (45 deg) Uranus & 135 deg. To Pluto.
- NOV 23 = Another Helio extreme as the Uranus/Pluto square becomes Exact and Earth/Mars=Pluto.
- NOV 26-27 = Helio Saturn 1/8 square (11.25 deg.) to Uranus/Pluto midpoint.
- NOV 29-30 Another Very Hot Sun as Helio Mercury conjoins Uranus & square Pluto. Mer. & Ur. also = midpoint Sat/Avg. of 9.
- DEC 1 = Helio Venus opposes Saturn = After this Sun quiets down a bit until...
- DEC 6 = Activity picks up but only for about a day +/- 1 day.
- DEC 18-20 = Solar activity sharply higher again, but not as high and not as long as previous.
- DEC 25 = Geo. (normal from Earth) Mars opposes Uranus which begins the dangerous period for the Mars-Uranus Crash Cycle!
November 13th or 23rd or in between could likely bring a "Kill-shot" from the Sun envisioned by a group of Remote Viewers!
We expect the worst Solar Storms since 1859, perhaps much worse! Be prepared if it fries the electric grid!

ATTENTION: The CP newsletters are usually mailed 1st Monday. Next CP will be Tuesday, Dec. 3
